Kitchen

DON'T

Use anti-bacterial products as the septic system needs bacteria. Pour fats, oils and grease down the drain. Use chlorine bleach.

All of these are harmful to the septic system.

DO Use phosphate free cleaning products. Wash dishes with phosphate free detergents. Run the dishwasher only when completely full.

*Any product that has any warning symbols or hazardous ingredient warnings should generally be avoided.

*Use 1 cup baking soda followed by 3 cups boiling water (plus 1 cup vinegar if needed) for unclogging drains, instead of commercial products.

Garbage Disposal

DON'T

Burn garbage. Feed wildlife. Leave garbage outside, unless in an animal-proof container. Leave any scented products outdoors. Leave pet food outside.

DO

Reduce, reuse, recycle! Rinse out bottles, jars and containers before putting them in the recycling box. Check local dump hours to dispose of waste. Pick up pet waste using a biodegradable bag.

*Wild animals cannot depend on you for their food source. Please do not feed the animals or leave your garbage outside.

*Recycling is mandatory in Haliburton County.

Bathroom

DON'T

Use automatic toilet bowl cleaners.

Use anti-bacterial hand soap.

Put paper towel, tissue, hair, baby wipes (even ones marked 'flushable'), or feminine products (no tampons) down the toilet.

Put anything down the toilet other than natural waste and toilet paper.

DO

Use non- antibacterial soap.

Use biodegradable cleaners (phosphate and chlorine free).

Use peroxide cleaners. Use single-ply toilet

paper.

Limit the amount of toilet paper used.

Conserve water to avoid overload to septic system.

*Septic systems need bacteria for it to properly function, thus anti-bacterial products are not good for the system.

*The toilet, sink and shower are connected to the septic tank, a system of tanks that allows waste to filter 'slowly' into the ground.

Laundry

DON'T

Do more than 1 laundry load per day. Use chlorine bleach. Take a shower or bath the same time as doing laundry.

DO

Use washing soda or oxygen bleach instead of chlorine bleach. Use phosphate free detergents.

Use peroxide stain removers.

Wait for laundry load to finish before draining a bath or taking a shower.

*Be aware of how much water is going into the septic system as it cannot handle large volumes of water at one time.

*Using washing soda or oxygen bleach in your laundry will not only whiten and brighten your clothes, but also help to keep the septic system healthy.
